☒ The Commissioner is hereby authorized to charge any fees which may be required, or credit any overpayment to Deposit Account No. 06-0502.

In addition, applicant notes with respect to any information that is not in English language as follows:

Reference C) describes a transporting installation for goods (1), in particular goods packed in boxes (1) or foil, having a feeding conveyor (2) and a discharging conveyor (3). The discharging conveyor (3) is connected to the feeding conveyor (2) at an angle (4) changing the direction of movement, and the individual goods (1) arrive at timed intervals on the feeding conveyor (2) working at constant transporting speed. The discharging conveyor (3) is equipped with a suction conveyor belt (6). Arranged on the discharging conveyor (3) in the connection region to the feeding conveyor (2) is a stop rail (7). The individual goods (1) to be transferred from the feeding conveyor (2) to the discharging conveyor (3) can be oriented on the stop rail (7) and at the same time or thereafter fixed in the oriented position by the low pressure of the suction conveyor belt (3) working at constant transporting speed.

Reference D) describes a conveyor line having a second drive mechanism (32) provided to lift the pallet (1) from the first drive mechanism (31) and then set it in motion. The direction of movement of the first drive and that of the second drive include a right angle. The second drive mechanism is formed as an endless conveyor unit and has upwards protruding elements to raise the pallet. The drives may be continuously revolving friction roller chains, with a section of the friction rollers of the second drive for lifting the pallet having a larger diameter.

The above-identified application discloses and claims an invention patentable over this prior art.

Entry of the references above set forth into the file of the above application
is believed to be in order and is respectfully requested.

Respectfully submitted
